

A guide how to add photos using the Talking Mats app on a tablet

We have made a quick example of a sub-mat with the topic “office” to have a discussion. You can also use this guide for adding photos to the existing topics.

1. Firstly ensure you have the relevant photos available in your camera roll

2. Add a New Session

3. Select a topic and then a set of symbols

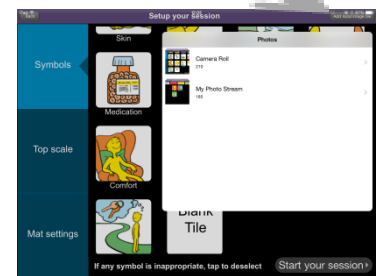

4. On this example “You from Social Care” has been selected

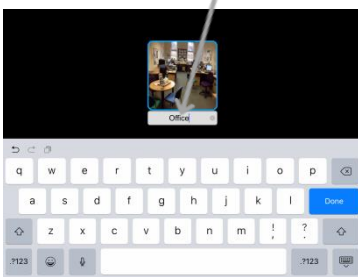

5. Deselect the symbols you don't need (in this example we only kept the Blank Tile)

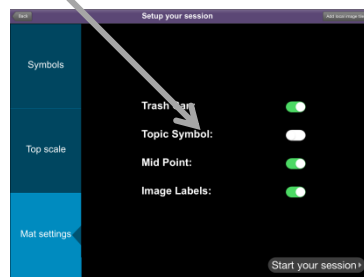

6. Now select “Add local image file” top right of the screen

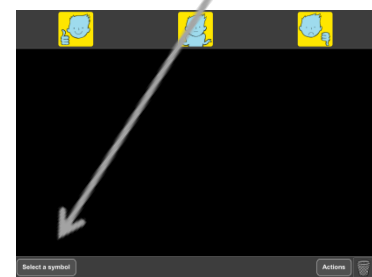

7. Select picture & type in the required text. On our topic I put “Office”

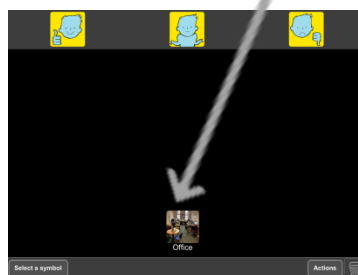

8. Now select the relevant top scale then deselect the topic symbol if need be

9. With your mat ready, “Select a symbol”

10. First select your topic symbol

11. Now you can select symbols in the same way to complete the mat and end the session
